

Pricing for **AMS** Manual (DRS) Dual Roller Shades Living Quarters and Driver Area Side Windows

US\$ SR 2012 (Rev 1.5)

Hardware :

Standard:

2 manual roller shades mounted on a single, compact mounting rail for easy and accurate installation. Shades feature slow-rise speed controllers with adjustable upper limit stops. Available with either sewn-in or exterior aluminum weight bars at no extra cost.

Optional:

Either both or only one of the shades can be supplied with internal electric 12V DC motor (e.g. manual day shade and electric night shade); motors - with adjustable upper and lower limit stops - can be operated through existing wired wall switches or RF remote controllers. Controllers are portable 2-channel or 16-channel transmitters that easily mount on wall. See surcharges below.

Single Shade:

For single daytime or night time roller shade, take 50% off DRS (double) unit prices shown below.

Fabric :

Standard (Base) Fabrics:

Daytime Fabric : Woven, flame-retardent polyester sunscreen fabric which protects interior against sun, heat, glare and damaging UV rays. Provides good outward visibility and some privacy during daytime (does not give privacy at night while lights are on).

Nighttime Fabric : Vinyl-based, flame-retardent room darkening fabric which provides privacy at night or whenever desired; can also be used to further reduce heat during excessive outside temperatures.

Optional Fabrics:

Several different designer screens and privacy fabrics are available at a surcharge, as per separate specifications and upcharge table below Fabric Group B, C and D).

Price for Manual DRS Unit with Standard (Base) Fabrics (includes day & night time roller shades)
